SZENT ISTVÁN UNIVERSITY was established in January 2000 with the integration of the University Veterinary Science, four faculties and institutions of the Godollo University of Agricultural Sciences, three faculties of the University of Horticultural and Food Sciences, Teacher Training College of Jászberény and Ybl Miklós Technical College. With the foundation of Szent István University the institutions set the objectives of harmonising their training, research, training organisation and management activities, thus ensuring better adaptation to the changing social requirements. Szent István University intends to pursue graduate and postgraduate training, scientific research and extension service activities primarily in the field of providing infrastructure and human resources for the rural regions and settlements, and developing agricultural economics, environmental management and technical services. Courses of the integrated university cover wide areas of agricultural production and processing, veterinary medicine, food production, general and agriculture-connected business activities, foreign trade, technical development and operation, architecture, rural and settlement development, environmental management, human resources management, teacher training educational and social worker training. The University offers all the training levels connected to each other from post-secondary training to postgraduate doctoral training in eight scientific fields with the possibility of obtaining scientific degrees.
